

Highway improvement - Live Labs 2 Project • May/June 2024

St Keverne Resurfacing

As part of our Highway Maintenance work, daytime road closure will be in place through St Keverne from **Wednesday 29th May – Thursday 6th June** while resurfacing work is carried out under the Live Labs 2 project.

To facilitate the surfacing work, road closures will be operational between the hours of 7.30am and 5.00pm on weekdays. The closures will be lifted each evening and over the weekend. The width of the site means we do not have sufficient space for vehicles to pass the machinery being used. These arrangements are necessary to protect road users and give our workforce a safe working zone.

Please note, during working hours, a Clearway Parking Zone will be in force within the surfacing working areas. Any vehicles parked in the signed areas during this time will be towed. Any designated parking bays within the area will be suspended. Please see the reverse for more information.

We will have marshals on site to support residents and businesses needing access.

The resurfacing scheme is part of the Live Labs 2 Project, a three-year £30 million Department for Transport programme.

The Council successfully bid for this funding and was awarded around £1m, which will be used to top-up the money available for highway maintenance. This means we can trial new materials and innovative ways of working to help reduce carbon in three locations across Cornwall.

The surface course we will use is a low carbon material called Milepave, which offers significant carbon savings compared to traditional surfacing materials.

For more information on the Live Labs 2 project, visit www.adeptnet.org.uk/livelabs2projects. Cornwall Council is part of the Wessex Partnership.

Thank you for your patience while these works take place.

Access arrangements

From 29th – 31st May Access for residents and businesses will be maintained through gateways managed by traffic marshals. Residents will need to stop at the gateways and our staff will help you to get into, or out of the roadworks site safely using the right route.

Please be supportive by respecting and responding to any speed restrictions and the safety instructions given by staff. If our teams need access or have to move machinery out of the way there may be significant delays.

We will always do our best to accommodate day-to-day requirements, and access will be maintained as much as possible for residents directly impacted by the closure.

From 4th – 6th June, access will be strictly limited due to the Milepave treatment. This treatment requires time for the material to cure. Once the treatment is complete, it will take around one to two hours before it is safe to walk on the treated surface.

The closure will be split into smaller phases while access is severely restricted.

There will be no access for deliveries or non-emergency vehicles.

Emergency access will be maintained at all times.

Working safely

We encourage drivers to keep to the speed limits and follow the appropriate signage to ensure the safety of those working on site and fellow road users.

Please be aware of the following hazards while the work is taking place.

- Uneven road surface where the old surface has been removed
- Raised manholes, gullies, and other service boxes
- Varying kerb heights when stepping off the footway
- Please use any designated crossing points provide

What is a clearway parking zone?

Introducing Clearway zones in nominated roadwork sites across Cornwall allows the removal of parked vehicles which are obstructing highway maintenance and improvement works.

Under the Traffic Management Act 2004, Cormac, on behalf of the council, will declare nominated roads a Clearway zone for the period of the works. All households and businesses in the affected area will receive a letter before the work starts and signs will be in place to inform road users about the parking restrictions.

While the majority of vehicle owners ensure their vehicles are not causing an obstruction.) Occasionally, vehicles are left parked despite being notified in advance through signage and direct communications.

The site team will make every effort to try to find the driver or owner of any car parked before requesting its removal.

If a vehicle is towed away for parking in a clearway zone an approved contractor will remove the vehicle to a safe place.

The owner/keeper will need to phone 0300 1234 222 to arrange collection of the vehicle.

Notifications

Our work is often weather dependent and can be delayed by heavy rain.

If this situation arises, we will do our best to update the advance notice boards on the site.
